

BUFFALO

AIR HANDLING

The mission of Buffalo Air Handling is to operate our business in such a manner that it satisfies the needs of our customers, our employees, and our owners.

The 3D Model

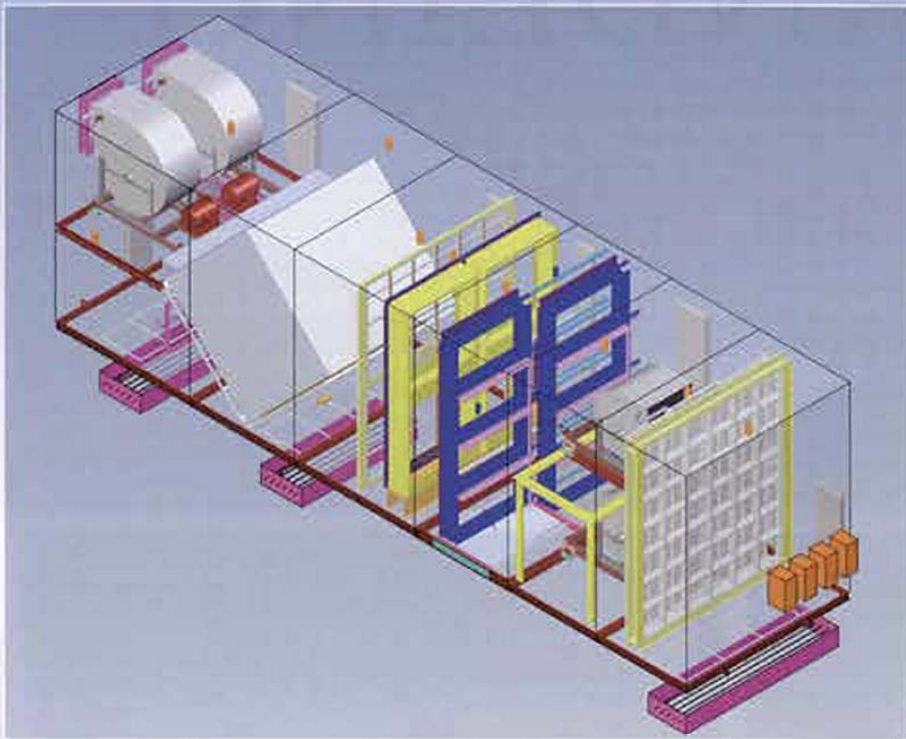

The Product

BUFFALO AIR HANDLING

*Revit® and BIM (Building
Information Modeling)
Engineering Assistance*

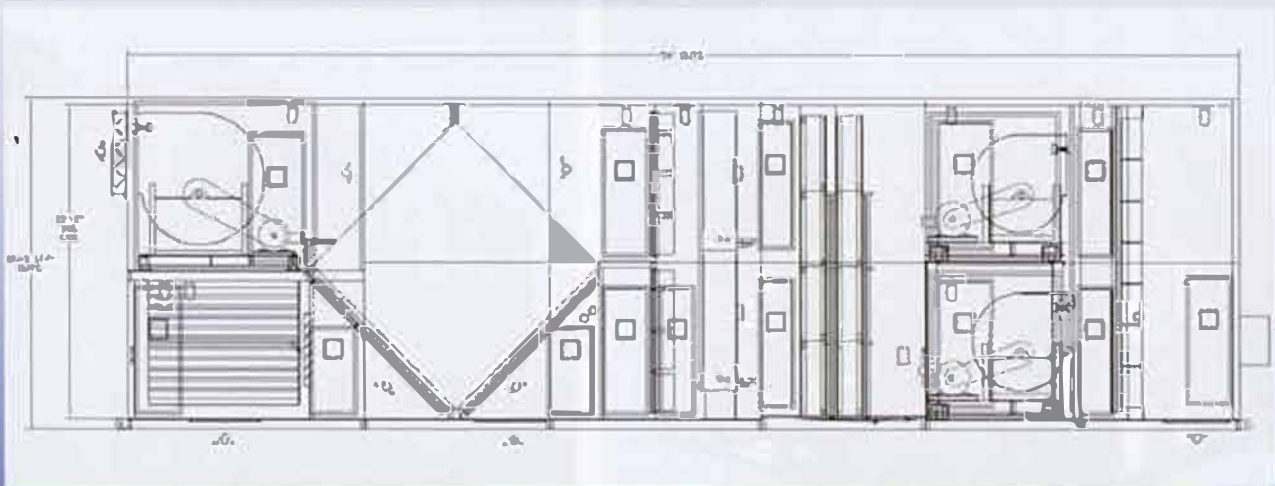

Revit® and BIM— two engineering and design advancements in the HVAC industry and Buffalo Air Handling can offer both!

Buffalo Air Handling uses 3D modeling techniques for 100% of our air handling unit designs.

Our completed 3D air handling unit model can be exported into Revit® and then downloaded into a master building model by the customer.

BIM performance content can be added to the Revit® model. The BIM content includes specific overall air handling unit and individual component performance.
